15. FAIR VALUE MEASUREMENTS

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

16. ANALYSIS OF PERFORMANCE (CONTINUED)

(A) Performance of the current quarter against the preceding quarter (Q3'25 vs Q2'25)

Total revenue increased by 1.1% to RM2,589 million in Q3'25, driven by a 1.7% growth in service revenue to RM2,241 million, supported by both consumer and enterprise segments.

Consumer business revenue rose by 1.4% quarter-on-quarter to RM1,823 million, contributed by growth in both postpaid and prepaid revenue. Postpaid growth was supported by increase in postpaid subscriptions by 1.2% to 4.09 million and higher inbound roaming revenue. Prepaid revenue was stable, higher revenue was mainly due to lesser days in previous quarter.

Enterprise revenue grew by 2.7% to RM418 million, largely due to higher wholesale services.

EBITDA improved by 0.7% to RM1,102 million driven by an increase in service revenue. Profit after tax grew 3.5% to RM412 million from higher EBITDA.

Capital expenditure increased to RM224 million in Q3'25, following typical annual trends. Operating free cash flow ("OFCF") improved to RM1,112 million, up 19.7% quarter-on-quarter, due to lower regulatory payment and effective working capital management.

(B) Performance of the current quarter against the preceding year corresponding quarter (Q3'25 vs Q3'24)

Despite being impacted by new commercial arrangement for Maxis Device Care program and reduced regulated interconnect rates, service revenue increased by 1.3% to RM2,241 million and consumer business higher by 0.3% to RM1,823 million. Growth in consumer business was supported by our targeted approach in acquiring and retaining customers which resulted in an increase in total subscriptions. Enterprise business revenue grew by 5.6% to RM418 million mainly driven by higher wholesale services.

EBITDA increased by 5.2% to RM1,102 million, and EBIT grew 9.0% to RM651 million, driven by higher service revenue and effective cost management. Profit after tax increased by 12.6% to RM412 million, in line with higher EBIT.

Capex was higher by 60.0% to RM224 million as Maxis continued investments to future-proof its integrated network infrastructure. OFCF improved by 47.7% to RM1,112 million primarily due to higher regulatory and tax related payment in Q3'24.

16. ANALYSIS OF PERFORMANCE (CONTINUED)

(C) Performance of the current year against the preceding year (year-to-date (“YTD”) September’25 vs YTD September’24)

Total service revenue for YTD September’25 was marginally lower due to the new commercial arrangement for Maxis Device Care program and reduced regulated interconnect rates, excluding these, service revenue would be higher.

Consumer business recorded service revenue of RM5,393 million, a slight decrease of 0.8%, mainly due to the reasons mentioned above. Enterprise business revenue increased by 3.3%, underpinned by increased mobile subscriptions and higher wholesale services.

EBITDA for YTD September 2025 increased due to continuous effective cost management. EBIT and profit after tax increased in tandem with EBITDA.

Capex for YTD 2025 was higher, focusing on upgrading mobile infrastructure and fibre expansion. OFCF was higher year-on-year attributable to strong working capital management.
